

Wireless Docking Gateway (VD30)

**One Year
Warranty by
Manufacturer**

Easy To Use

Just Dock-It !

**Share Your
Mobile Broadband
Via USB Modem**

**Supports HSDPA,
3G, EDGE & GPRS**

VigSys VD30 is the first WiFi Router developed to support HSxPA (3.5G) connection via USB Modem. On Local Area Network (LAN), it supports both the wireless WiFi 802.11b/g and Ethernet 10/100Mbps connections.

UNLIMITED MOBILITY

VigSys VD30 offers a plug and play, instantaneous true wireless solution; fixed line or DSL cable connection is NOT required. Just insert the USB Modem to create an INSTANT HOTSPOT.

APPLICATIONS

VigSys VD30 is a HSDPA or HSUPA (HSxPA) USB Modem docking station. It converts HSxPA USB Modems into a full featured WiFi Router.

It converts single user USB modem into a multiple users ready WiFi Router, reducing the cost for broadband connection.

It can be used as a portable WiFi hotspot solution for e.g. off-site meeting, conferences, trade shows etc.

KEY SPECIFICATIONS

Wireless WAN	- USB mini Type B Male Connector - Supports HSxPA USB Modem
WiFi Router	- Compliance to 802.11b/g standard with 100mV transmission power - Built-in Web Server - DHCP Server / Client - VPN Pass-through - Configurable Firewall - Secure Web Base Configuration Applications - WEP, WPA and WPA2 Encryption - Network Time Server (NTP) Support
Ports	- 10/100 Ethernet RJ-45 x 1 - USB mini type B male x 1 - DC Power Input x 1
LED Indicators	- PWR, LAN & WLAN
