

Hannover, Germany March 4, 2008 –

VigSys Sdn Bhd (“VigSys”), an emerging data mobility solutions manufacturer; today unveiled both the VigSys HUSBM-1, a HSDPA USB wireless modem, and VigSys HWGR-2, a HSDPA modem WIFI Router at CeBIT 2008. The stylish and compact design coupled with superior performance devices are proud products of Malaysia, made for the worldwide connectivity over the world’s leading cellular data networks.

Both products are designed to address the increasing demands on mobile connectivity for consumers and enterprise travelers. The VigSys HUSBM-1 is a global modem featured by its tri-band HSDPA/UMTS and quad band EDGE/GPRS frequencies with maximum downlink speed of 7.2Mbps and uplink speed of 384Kbps. It allows travelers to access to wireless broadband virtually on any worldwide HSDPA, UMTS, EDGE and GPRS networks. In addition to the similar capacity of the VigSys HUSBM-1, the VigSys HWGR-2 with WIFI router features allow sharing of the high speed wireless broadband access amongst small group of users.

Simultaneous to the launch of the products, VigSys announced that through its parent company, Insas Technology Bhd, it had signed a supply agreement with Option, a leading wireless technology company in Belgium. Under the agreement, Option shall supply wireless technology modules & other products for VigSys’ data mobility products.

The VigSys HUSBM-1 is currently available and the VigSys HWGR-2 is expected to be available in April 2008, both in Malaysia and throughout VigSys’ worldwide distribution networks. .

About VigSys Sdn Bhd (“VigSys”)
